

## TECHNOLOGICAL AND APPLIED STUDIES (TAS)

### TEXTILES TECHNOLOGY STAGE 5

*"Textiles Technology encourages students to be creative and at the same time learn about the materials that they are working with".*

Textiles Technology is an elective offered to Stage 5 students at Masada College. This course involves students developing their knowledge of fibre, yarn and fabrics, as well as the development of their skills through designing, manufacturing and production of textile items. Textiles Technology encourages students to be creative and at the same time learn about the materials with which they are working.

Throughout the year students will complete a number of different projects, finding their inspiration through various sources, from the world in which we live. Projects are selected based on the five focus areas which include: apparel, non-apparel, furnishings, textile arts and costume. Textiles Technology is available as a 100 hour or 200 hour course. The 100 hour course introduces students to the world of Textiles and allows them to develop skills in sewing, garment construction, fabric decoration and project portfolio documentation. The 200 hour course further develops previously learnt skills and knowledge and allows students to be innovative with their projects.

If students wish to continue with their study in Textiles Technology in Stage 6, they can choose Design and Technology as a HSC course, with a focus on Textiles.
