Masada College is delighted to invite you to our 3rd Cultures of Thinking Conference

Pictures of Practice
Cultures of Thinking in Action

The conference features as its keynote speaker the inspirational Mark Church, co-author of Making Thinking Visible, and includes a wide variety of fascinating workshops with practising educators.

The conference will explore questions such as:  
- What are cultures of thinking?  
- What do they look like in action?  
- Why should we make time for thinking?  
- How do we build rich Professional Learning Communities for teachers?  
- How might we focus students’ attention on learning rather than work?  
- How do we encourage deep rather than surface understanding?  
- What is the role of inquiry-action projects?

Mark Church works with educators throughout the world striving to create cultures of thinking in their classrooms and schools, challenging them to foster students’ thinking dispositions in service of deep understanding. He is currently a consultant with Harvard Project Zero’s Making Thinking Visible and Cultures of Thinking initiatives worldwide, drawing upon his own classroom teaching experience and from the perspectives he has gained working with educators throughout North America, Australia, Asia, and Europe. Together with Ron Ritchhart and Karin Morrison, Mark is co-author of the book Making Thinking Visible: How to Promote Engagement, Understanding, and Independence for All Learners.
